**Warning**

DANGER: VAPOR HARMFUL. FLAMMABLE. EYE & SKIN IRRITANT. Do not swallow. Do not breathe fumes. Do not use near heat, sparks or flames. Do not smoke. Do not get in eyes. Do not get on skin or clothing. KEEP OUT OF REACH OF CHILDREN. Wear safety glasses and chemical resistant gloves. Use only in a well-ventilated area. Contains toluene. Cancer and Reproductive Harm - www.P65Warnings.ca.gov

**First Aid**

If swallowed, call a Poison Control Center or doctor immediately. Do not induce vomiting. If in eyes, rinse with water for 15 minutes. If on skin, rinse well with water. If breathed in, move person into fresh air.

**Limited Lifetime Warranty**

Sashco warrants this product will substantially meet published specifications on the date of sale. If it fails to do so, return unused portion with original sales receipt for replacement or refund, at Sashco’s sole option. These are purchaser’s sole and exclusive remedies for any breach of warranty. Purchaser must determine suitability of product for purchaser’s specific needs and assumes all risk associated with its use.

*For a detailed description of the warranty and exclusions, please visit our website at sashco.com.*

**Alyster Plunger**

10.5 cartridges come with Sashco’s unique Alyster plunger. A flexible telescopic diaphragm not only stops material flow, it actually pulls material back into the nozzle!

- **Tight Seal** – Increases shelf life and minimizes leakage.
- **Stop Flow** – The flexible telescopic diaphragm assures that material flow will stop when caulk gun pressure is released.

**Typical Properties**

**Through the ROOF!**

Seals Leaks that Asphalt Can’t!

- Clear waterproof sealant
- Repels water immediately
- Can be applied in cold temperatures
- Highly elastic—will not crack
- Expands and contracts with temperature

**Specifications**

- Meets FHA requirements.
- The data reported here is believed to be reliable. No warranty is made concerning its accuracy of the results obtained from its use.

Roofs Move
Wind gusts and changes in weather put your roof in constant dynamic motion. Asphalt roof caulks dry hard and crack. They can’t handle the movement, but Through the ROOF! can. It’s the clear, waterproof, ultra-elastic sealant made to permanently stop and prevent roof leaks.

Why Use Through the ROOF!?
• Stops and prevents roof leaks
• Waterproof — repels water immediately
• Ultra-clear — seals over tile, brick, shingles and more — invisibly
• Apply in almost any weather — in temperatures down to 0ºF
• Sticks to wet surfaces — can be applied during rain or in standing water
• Excellent durability — Lasts 20x longer than asphalt
• Excellent UV resistance — goes on clear and stays clear
• Super elastic — moves with temperature changes, won’t dry hard and crack

Where to Use Through the ROOF!
• To repair broken shingles, shakes and tiles
• To glue down shingles and standing water — seals over tile, brick, shingles and more
• To seal around: front edges of flat roof tiles
• To repair broken shingles, standing water
• To prevent roof leaks — goes on clear and stays clear
• On metal and other metal surfaces
• On galvanized metal and aluminum flashing
• On brick, block, mortar and chimneys
• On PVC and ABS vent pipe, and rubber roof membranes
• On Metal RV roofs
• On Vents and air conditioning units
• On Roof jacks and cables

Adheres To:
(all conform to ASTM C794)
Most building materials, including:
Metals
• Aluminum • Brass • Steel • Copper
• Powder-coated metal • Galvanized steel
Plastics
• ABS • Vinyl • Polycarbonate • Lexan® • PVC • Fiberglass
• Nylon • Acrylic Sheet • Plexiglass®
Other Surfaces
• Asphalt • Brick • Ceramic tile • Concrete • Mortar • Polyurethane
• Stucco • Glass • Terra cotta • Cement • Wood • Cloth/Canvas
• Stone • Polyisobutylene

Where Not to Use
• Areas of submersion or frequent, prolonged puddling
• With polystyrene insulation
• Containment applications
• Will not adhere to or is incompatible with: Aquaseal®, Kynar®, polypropylene, polyethylene, silicone, Styrofoam® (it dissolves it), waxes
• For materials not listed, contact Sashco for guidance or test first for compatibility.

Before You Start: Good Tips to Know
• Be sure you’ve located the source of any roof leaks to ensure you apply Through the ROOF! in all the necessary locations.
• Through the ROOF! can be applied in extreme temps (down to 0°F and up to 120°F). Be aware that large beads applied in hot weather (above 95°F) may exhibit slight bubbling.
• Through the ROOF! cures by solvent evaporation. Lower temperatures and higher humidity can extend cure time.
• Close ventilation intakes on roof until solvent dissipates (approximately 12 hours).
• Do not apply to frosty or icy surfaces. To remove frost, wipe down the surface with rubbing alcohol.
• To ease gunning in cold weather, keep cartridge warm until use.
• Natural shrinkage may give some joints a concave appearance. Multiple applications may be needed to fill the joint flat.
• Flammable during early cure (24–48 hours); fully cured in 1–2 weeks.

Application Steps
Substrate/Surface Prep
• If dirt or oils are present, use any household cleaner to remove and allow to dry.
• Cut away lose materials or old caulking. Any existing silicone should be completely removed to ensure proper adhesion of Through the ROOF! We recommend McKanica® Silicone Caulk Remover.™ “McKanica” is a registered trademark of its owner.

Applying
Through the ROOF!
Cartridge Grade
Joint design: Insert Sashco’s Filler Rope™ (backer rod) into joints deeper than 1/2” to provide for proper sealant depth and a stronger, longer lasting seal that uses less Through the ROOF! (refer to diagram for details).
• Choose bead size. Cut the nozzle at a 45° angle to your desired bead size and puncture the inner seal.
• Gun Through the ROOF! into the joint and release the trigger at the end of each bead.
• To ensure best adhesion, tool (smooth out) the bead using soapy water or mineral spirits and a light, skimming touch.

Brush Grade
• Use a foam brush or paint brush to apply Through the ROOF! 1/8” to 1/4” thick. Due to flammability, do not apply over 1/4” thick.
• Work the product on to the surface to ensure good contact and optimum adhesion.
• When applying to wet surfaces, tool and push Through the ROOF! onto the surface to displace the water and ensure a proper bond with the substrate.

Cleanup & Storage
• Clean tools and unwanted surface spills with mineral spirits.
• Clean hands with citrus-based hand cleaner until all product is removed.
• Through the ROOF! can be stored if the nozzle is tightly wrapped with plastic wrap and a rubber band. Seal cans tightly with original lid.
